

ABSTRACT OF THE DISCLOSURE

An image-forming apparatus is disclosed.
The image-forming apparatus includes a fixing unit.
The fixing unit includes: a heating part including a
5 heating element; a power storage unit including a
chargeable and dischargeable capacitor and supplying
power to the heating part so that the heating element
of the heating part generates heat; and a controller
controlling the operation of the power storage unit.
10 When the image-forming operation of the image-forming
apparatus is suspended by an abnormality, the
controller performs control such that the capacitor
is charged in accordance with its remaining amount of
stored energy.
